## **InOne Technology Offers Retrofit Door**

InOne Technology has introduced a retrofit door with all the features of a brand new machine for a fraction of the cost – the AllInOneDoor. The door, manufactured and assembled in America, offers a complete technology upgrade.

The AllInOneDoor provides a new machine drop bin complete with OEM mounted sensors, equipped with InOne boards, LEDs and drop sensors and is cashless/telemetry ready.

The door is made from all metal parts for longer durability, rounded edges for a modern look and custom skins to enhance appearance. The door is light for easy installation in the field but has the strength to withstand rigorous field conditions.

Enhanced upgrades offered include MDB coin mechs; bill acceptors; cashless/telemetry systems; DEX' a 2-line organic LED bright, easy-to-read 7-inch touchscreen display; a customer motion sensor (PIR) to turn on lights with programmable lighting brightness.

The AllInOneDoor is ADA compliant and features a one-year warranty.
